

TSD Program Review
Blue Ribbon Committee update
July 16, 2001

At the July 16th meeting of the Blue Ribbon Committee meeting, the group synthesized the feedback received from the All Staff meetings and identified the critical issues for deliberation and resolution. In its discussion, the Committee recognized that some members of the Cataloging Dept. have serious concerns about the proposed structure. It was agreed that the BRC should provide an opportunity for the Cataloging Dept. to ask questions and obtain further clarification on how the proposed structure would work. A meeting will be scheduled as soon as possible.

Carlen reported on the C-Team discussion of the proposed model and shared the recommendations from that meeting. One of the requests from C-Team is that the BRC draft a working paper that describes the strategy and the final proposal when complete.

Carlen Ruschoff
Director of Technical Services
