What is **find it**?

find it is a tool connected to the University of Maryland Libraries' catalog, periodical databases, and e-journals. It provides you with various options for accessing books, journal articles, and more:

- The **full text** of an article or book may be available online. If so, **find it** will link you to the document by a direct link or through another database.
- **Library Holdings:** A book, journal, or other item may be physically available in the University of Maryland College Park Libraries, or through another library in the University System of Maryland & Affiliated Institutions (USMAI). **find it** will link you to the Libraries' catalog record for that item.
- **Interlibrary Loan:** If the item is not available online or in a USMAI library, you may be able to borrow a copy from a different library. This process may take up to two weeks.

How to use it:

- Start at the UM Libraries' home page: www.lib.umd.edu.
- Click on **Catalog** to search for books, or click **Research Port** to search for articles.
- Complete your search. You will see a list of search results.
- Click **find it** to see what options are available for each item:
