

LaTeX Projects: Resources and Tips

LaTeX Distribution & Information

latex-project.org

Package Documentation

ctan.org

UMD LaTeX Template

ireap.umd.edu/resources/thesis-templates

STARTER TIPS:

Labeling: References & Figures

- Pick logical and organizable names for files (without special characters) such as:
0101_solarflare.jpg - chapter 1, section 1, picture of solar flare
crosby2015 - reference 1st author last name Crosby, pub date 2015

Commenting:

- Make notes like code files and notes about your writing

Careful of copy and pasting from MS Office or other word processors:

- Special characters are coded, not read directly by LaTeX
- Apostrophe's, quotes, and marks over/under letters need to be coded

Options for review/track changes:

- Overleaf collaboration: overleaf.com
- Git: github.com
- latexdiff package (requires Pearl)
